## Profile

Seeking challenging opportunity to work for an organization to enhance and expand my spectrum of knowledge, skills, and techniques that can benefit the organization as well as my career growth.

## Projects

- **Go Cart** [Link](#)

Developed a **React.js** e-commerce web application "Go Cart" utilizing **Redux** for state management and **SASS** for styling. Implemented features such as product display, shopping cart, and checkout process to provide a seamless user experience.

- **Front Code** [Link](#)

Front Code Is an online code editor built with **React.js**. Online Editor supports **HTML, CSS, and JS** code with instant website view. The editor supports **auto-save** of work using Local Storage and Instant preview as well.

- **Hacker News** [Link](#)

Developed a News application using **React JS and CSS** which retrieves data from an **API**. Designed and implemented a clean and user friendly interface for displaying the latest news articles to the users. Utilized React components to dynamically fetch and render news data, allowing for an efficient and seamless experience

- **Taxi-Fare Calculator** [Link](#)

Developed a Taxi fare calculator using **HTML, CSS, JavaScript, and Google Matrix API**. The app features a responsive design and utilizes Google's Direction Matrix API to provide accurate and convenient fare calculations with destination suggestions.

- **SAP-X** [Link](#)

Improved the design and functionality of the ISRO website **using HTML, CSS, JavaScript and Bootstrap** to enhance user interface and responsiveness, resulting in a more visually appealing and user-friendly experience.

## Internship
